

Instructions to use BITS Virtual lab for Webinar's

Step 1: Access the **CSIS Lab - User Manual** from the BITS elearn portal. Follow the instructions explained the page number from 1 to 7 and 22 to 27 to access **Virtual Lab**

Step 2: **Initialise Jupyter Notebook**, either by clicking icon in desktop or using the command 'jupyter notebook' in terminal.

Step 3: **For File Transfer:** Use the google drive linked to your BITS Email id in virtual lab for moving webinar files to virtual machine.

Step 4: **Prerequisite** of libraries

Install scikit-learn (sklearn)

- Install scikit-learn (sklearn) within a Jupyter Notebook environment, you can use the pip command directly within a code cell.
- Open your Jupyter Notebook: Launch Jupyter Notebook and open a new or existing notebook.
- Create a new code cell: If you're in an existing notebook, add a new code cell.
- Install scikit-learn using pip: In the code cell, type the following command and then run the cell (Shift + Enter)
`!pip install scikit-learn`
- Verify the installation: After the installation completes, you can verify it by importing scikit-learn and checking its version in another code cell:
`import sklearn
print("Scikit-learn version:", sklearn.__version__)`

Install statsmodels

- In the code cell, type the following command and then run
`!pip install statsmodels`
